

AIA: Innovations in Architectural Concrete Paving and Flooring

Program #: 1F0201

Credits: 1 LU

HSW: Yes

Length: Maximum 1 hour

Description:

The program examines decorative concrete application techniques, design options and benefits over other flooring and paving systems. Participants will learn about a variety of application methods, innovative systems and inventive products used when working with the versatile medium of concrete. The program addresses the many ways to add texture, color and design elements to new or renovated hardscapes surfaces.

Learning Objectives:

By the end of your AIA presentation, the participants should be able to:

- Understand and name four applications for concrete paving and flooring options.
- List three reasons to design with architectural concrete.
- Identify specific coloring techniques for concrete.
- Identify specific systems or decorative concrete options.
- Compare benefits of utilizing concrete over flooring/paving options.
