

# AIA Interior Design Presentation

## Learning Objectives

**Program #:** 11o806

**Program:** Exploring Colored & Textured Concrete in Architectural Design

**Length:** 1 hour

**Credits:** 1 LU hour

**HSW:** Yes

### **Description**

The program examines the latest techniques and trends in decorative concrete flooring, including overlays, micro-toppings and textures/imprinted options. Participants will learn about a variety of interior and exterior application methods, novel systems, and inventive products used when working with the versatile medium of concrete; a medium that is sometimes underestimated in its potential. The program will present the fundamentals of integrating personality and products, ultimately illustrating what's possible when working with concrete

### **Learning Objectives**

- Understand color plastic and cured concrete techniques.
- Understand texture plastic and cured concrete techniques.
- Understand specific colored & textured overlay (toppings) renovation techniques.
- Identify and compare interior design techniques utilizing decorative concrete solutions.
