

Project Profile

Decorative Pool Deck

Old Granite texture transforms
Eden Prairie Pool Deck

A backyard pool and fire pit are great ways to take a vacation without leaving home! And this backyard was asking to be transformed into an oasis for relaxing days and nights with family and fun-filled weekends with friends.

Previously occupied with a small 100 square foot patio, this quaint backyard was underdeveloped and misused. With guidance and design from Concrete Arts professionals, these homeowners watched their undefined yard transform into a spectacular pool deck, patio and fire pit. Stamped with Old Granite Texture and colored with Mesa Beige integral colorant and Desert Tan antiquing, the decorative concrete surfaces provide a unique surface texture allowing for a great feel and look.

Custom concrete pool coping was installed to give the pool edge a classic and refined look. But the subtle highlight of the entire project is the one-of-a-kind hand-carved concrete fire pit surround. The perimeter of this slab was custom carved by Concrete Arts craftsman to create a thickened edge which solved an elevation issue, while also delivering a look as if the slab was a giant boulder unearthed through years of soil degradation.

Project:
Old Granite, Stamped
Concrete

Location:
Residential
Eden Prairie, MN

Problem:
Lack of hard
surface space in
the backyard for
relaxing and
entertaining.

Solution:
Tore out 10x10
pad and put in a
beautiful 3,000
square foot
decorative
stamped patio
and a one of a
kind fire pit.

Results:
An absolutely
stunning pool
deck with
customized
coping and
fireplace. Just a
simple yet
breathtaking
entertaining area.
