

Project Profile

Nativity Catholic School

250 quotes and 2,600 square feet in memory of Nativity

The Nativity of Our Lord Catholic Parish in St. Paul, MN put on a fundraiser for its private school. The fundraiser consisted of featuring an area in the front entrance to the school commemorating loved ones and past members of the school and parish.

The 35 year old concrete was tore out and poured new with an integral color, Slate Gray. This 2,600 square foot area was then etched with a retarder to create a beautiful Sand Cast texture.

All 250 quotes were then sand blasted into the concrete where we previously cut faux joints in the shape of the Nativity emblem. Instead of a separate pour or staining, we sealed the surface with two different products, Siloxean and Acrylic Solvent Based Sealer. These sealers created two different finishes on the Sand Cast accenting the borders, stairs, and sandblasted areas.

Nativity now has a beautiful entrance to the school where people take note of it's history and legacy. To you Nativity, we say thank you.

Project:
Sand Cast, Exposed Concrete

Location:
Nativity School,
St. Paul, MN

Problem:
Nativity needed a cost effective way to display fundraiser bricks sold to members.

Solution:
Update the front entrance with a sand cast texture and sand blast in quotes.

Results:
Nativity now has a beautiful Sand Cast entrance way that show-cases memories and thank yous of Nativity members in the shape of the Nativity symbol.
