## Exposed Concrete

There are two different looks to Exposed Concrete that Concrete Arts offers, Revealed and Sandstone.

**Revealed** is a sustainable finishing option that incorporates a unique aggregate and color blend. Revealed is placed over freshly poured concrete and then exposed to reveal the aggregates. The pronounced decorative aggregate finish is a resilient, sustainable option where low maintenance, slip resistant and a highly decorative concrete surface is desired.

**Sandstone** is designed for outdoor applications where an alternate to a conventional concrete finish is required. Utilizing specialized mix designs and additives, Sandstone resembles sand blasted concrete and can incorporate specialized sands and aggregates exceeding 3/8" diameter. The finish is an economical alternate to other decorative concrete finishes while producing a monolithic slab at low life-cycle costs due to the pre-aged nature of the surface.
